

As Meijer enters new communities throughout the Midwest, we understand the importance of supporting local organizations. Recently, we teamed up with the **Homer Glen School District 33C** to bring new computers into elementary and middle school classrooms to enhance student communication and writing skills. The district will also begin to hold evening continued learning classes for parents on the new laptops.

Homer Glen School District 33C aims to provide a high quality education to prepare and empower students for success through collaborative efforts with all community partners.
